

CalMaster calibration management software provides clear visibility for all your Measuring gauges / instruments, while ensuring the quality process is run in a effective way, ensuring regulatory compliance.

CalMaster is easy and simpe to use, that provides data to manages, helping them review calibration plan and its adherance. Enabling you to improve overall efficiency of technician and calibrartion team.

CalMaster helps you to monitor past calibration history, calibration schedule and locate gauge locations, retrieve calibration records, produce calibration certificates and bar-coded calibration labels. CalMaster Provides you with Graphical reports & analysis for MIS needs and Provides Audit trials for traceability.

Web based design enable the software to be accessed from any location in company through secured login that provides access to data as per role defined. The can be used from single user login to multi user.

Calibration Management Software

CalMaster software provides you with real time data on dashboard that makes gauge management so easy...

CalMaster user friendly dashboard allows user to quickly identify present calibration status and take actions without wasting time, User can access detail data by simply clikcing on the data chart to view further detail

CalMaster helps you in

- Managing gauges/instruments across Plants and location
- KPI on Dash board for fast access of data
- Secure and easy to use
- Helps you better manage your calibration workload,
- Increases Work efficiency of calibration team
- Manage calibration activity more efficiently
- Facilitates Audit trails

CalMast Provides Quick access to calibration schedule that helps plan calibration task with concerned engg or agency.

Some Key Features

- Track list of gauges sent out for calibration/repair
- Provides Calibration history log
- Provides multiple status indicators for Due listing and scheduleing
- Advance Filter to quickly access gauge calibration data
- Export gauge data to Excel
- Provides notofication in advance for due calibrartion
- Access calibrarion schedule from dash board
- Easy to use and cost effective
- Enforce calibration procedures.
- Print calibration worksheet and gauge calibration records.
- Attach calibration certificate and access as and when required
- User level access control
- Works on Desktop, Laptop, and Tab.

Calibration software is available with

Concurrent User license

- Single user
 - Five User
 - Ten user
 - Site License

System Requirement:

Single user

Site License

Five User

Ten user

Hardware requirement : Core 4 Processor, 8 GB RAM, 500 GB Storage Software: Dot net Framework 4.0, Sql Server 2012 Database, Operating System: Windows Server 2012 Edition Browser: Google Chrome, and IE.

We also provide existing master data integration service and free support for 6 months from date of software purchase.

Other services:

We also provide Barcode lable printing solution on thermal Tranfer printer, you can use paper or polyeter sticker for printing. We also provide barcode scanners for scanning barcode Sticker that enables error free and fast dataentry
